

# Overview of Field Epidemiology (2)

DR.KUMNUAN UNGCHUSAK

---

## Key Concepts of Field Epidemiology: How healthy turn to non-healthy

### 1. Disease is dynamic

There are 3 major determinants of a disease:

- Agent
- Host
- Environment

### 2. Risk factors

They involve precipitating factor, predisposing factor and enabling factor.

### 3. Natural of disease

The progression of the disease from the beginning to the end in the human body.

### 4. Disease prevention

- Primordial prevention
- Primary prevention
- Secondary prevention
- Tertiary prevention

A large, light blue watermark logo is centered on the page. It features a circular emblem with a silhouette of a traditional Thai temple (prang) in the center. The text 'INSTITUTE OF FIELD EPIDEMIOLOGY TRAINING PROGRAM THAILAND' is written in a circular path around the emblem. Below the emblem, the letters 'FETP' are written in a large, bold, serif font.

FETP
